*This list is updated periodically upon the receipt of new inspection data.*

## **Food Facility Report Key**

**Type** - Indicates type of inspection.

**C - Comprehensive Inspection:** Complete environmental inspection which includes both critical and sanitation items and food flow process (HACCP)

**M - Monitoring Inspection:** Specialized inspections performed to monitor critical steps of food handling for potentially hazardous foods.

**R - Reinspection**

**Critical Items** – Critical food safety items found NOT in compliance. Any critical items found to be in violation must be corrected during the inspection. Numbers appearing in this column indicate the food safety item found in violation. These numbers correspond to the following critical items:

- 1 - Food must be obtained from an approved source.
- 2 - Food must be protected from adulteration, spoilage and contamination. This item includes the presence of severely dented cans.
- 3 - Food workers must be restricted during illness or infection.
- 4 - Food workers must practice effective handwashing.
- 5 - Food must be properly cooled.
- 6a - Food must be held at proper cold holding temperature.
- 6b - Food must be held at proper hot holding temperature.
- 7a - Food must be cooked to proper temperature.
- 7b - Food must be reheated to proper temperature.
- 8 - Potable hot and cold running water must be provided.
- 9 - Sewage must be properly discharged.

**Reinspection Needed** – Reinspection is indicated [v] if a follow-up inspection is required to assure corrective action on non-critical violations and continued compliance on critical item violations.
